

Good

Closing Up

When you are closing the box up be sure not to overlap the flaps as this weakens the cardboard.

Packed Correctly

The correct size box reduces the risk of the product inside moving around and causing any damage to the parcel, make sure to fill any empty spaces with a minimum of at least two inches on all six sides.

Bad

Seal The Box Properly

When you come to applying tape to the box do not be shy with how much tape you use, we recommend six strips across each seam.
