

Type 5 CV Boot

Type 5 CV Boot

Boot supplied with or without bearing which is normally fitted with 1 x steel band

Bearing sits in small hole and onto driveshaft bar

Internal bearing sits here

Flange bracket normally sits here (Normally fitted to driveshaft with no inner CVJoint, but has tripod roller bearing which fits directly into gearbox)

Different bearing sizes are: (internal measurements)

A) 22.8 mm B) 23.8 mm C) 25.8 mm D) 28 mm

Example: If a 22.8mm bearing is required then the part number would be BK126A rather than BK126
