CV JOINTS & BOOT KITS

Top quality, wide range,
great availability

Production of the remanufactured CV joint began in 1979, so we really understand everything there is to know about this vital component in the driveline. In 2009, we replaced the remanufactured range of CV Joints with new, but only sourcing these from premium quality manufacturers.

The widest range

Our range is the widest in Europe, consisting of 1,100 part numbers, which between them account for almost 99% of the European vehicle parc. Our availability is consistently above 98% from stock, based on a same-day dispatch service.

We aim to be the first to have 'new to range' parts. Our on-going range development programme means that we constantly add new parts for the most modern vehicles on the road.

Production standards are premium, which is why we confidently offer a 60 Month, 60,000 Mile/96,000 km warranty. All CV Joints are supplied with the boot, 2 steel clips, grease, hub nut and replacement bands.

The best boots for the best CV joints

Our quality range of conventional tailored fit CV Boot Kits consists of over 300 part numbers. All boots are made from premium grade rubber or thermoplastic and are highly resistant to water, salt and grit ingress.

Unsurpassed service

At Shaftec, everything we do is carried out under one roof at our remanufacturing plant in the heart of the UK.

To find out more about the full Shaftec range of remanufactured Brake Calipers, Steering Racks, Steering Pumps and Driveshafts, as well as our new Driveshafts, CV Joints, Propshafts, Steering Pumps, CV Boot Kits and Steering Rack Gaiters, contact us by e-mail at sales@shaftec.co.uk or visit us at www.shaftec.com
