

REMANUFACTURED AND NEW PARTS TO THE MOTOR TRADE

REMANUFACTURED AND NEW PARTS TO THE MOTOR TRADE

Building on the skill and experience of two men who worked out of a backyard in Birmingham remanufacturing automotive parts for one Vehicle Manufacturer, the Shaftec brand was introduced in 1995.

Shaftec is now firmly established as the UK's strongest and most experienced remanufacturer and supplier of Drive, Steer and Stop parts for the UK & European independent aftermarket – catering for more than 62 global vehicle manufacturers.

**REMANUFACTURED
AND NEW UK PARTS**

**12 - 60 MONTH
WARRANTIES**

**SAME DAY
DISPATCH**

**TECHNICAL
SUPPORT**

Shaftec has been supplying remanufactured and new parts to the motor trade for over 20 years and is now firmly established as the leading transmission, steering and braking supplier to the UK aftermarket. A full range of 25,000 part numbers available from stock includes Driveshafts, CV Joints and Boot Kits, Propshafts, Brake Calipers, Steering Racks and Gaiters, Steering Pumps, Steering Columns and Electric Steering. Shaftec offers its customers the largest range of premium products, backed by the highest levels of availability and exceptional customer service.

As part of a multi-million pound expansion programme, in January 2015 the business relocated its Headquarters in Birmingham to new 50,000sq ft premises – to incorporate its remanufacturing facilities and warehouse into one site. By carrying massive stocks we are able to offer our customers 95% availability on our whole catalogue with a guaranteed next day delivery. If we put our name on the box, you can be certain that what's inside is of the highest quality. Shaftec are fully ISO Accredited – ISO 9001:2015.

Our website provides the visitor with product information and full access to our ECAT on line catalogue. Full Application details for the Shaftec product range can be found on our ECAT on line catalogue. Search by VRM, Vehicle Make / Model, Part number or Product Specification. Plus we are Premier Data Supplier to MAM Autocat and TecDoc.

We know the market and your business inside out – and we know that what you need is the widest range of top-quality parts, delivered to your door exactly when you need them.

In line with this, we make it a priority to keep on top of the latest industry legislation so that we can properly advise our customers. We also know that 'it takes a village' and so are active members of industry bodies that fight for the rights of the aftermarket, such as the IAAF and APRA.

All under one roof

Process control is essential and at Shaftec, it's as good as it gets. Having a facility that's the size of a football field means we can do everything under one roof; from receiving and storing core, carrying at least six months of stock at any one time, through to the entire remanufacturing, testing and boxing process. Knowledge is power, and we have it in abundance.

...we are able to offer our customers 95% availability on our whole catalogue with a guaranteed next day delivery.

PRODUCT RANGE

Premium products

Shaftec offers its customers the largest range of premium products available from stock, providing exceptional car parc coverage. By focusing on specific car parts being Drive, Steer and Stop we offer not only a specific range of product but also offer exceptional knowledge within the range, backed up with technical support and downloads.

This is supported by the highest levels of availability and customer service.

By carrying massive stocks we are able to offer our customers 95% availability on our whole catalogue with a guarantee of next day delivery.

1979

At shaftec, we've been
**remanufacturing
driveshafts since 1979**

6,500

Our premium new and
remanufactured range consists
of **over 6,500 part numbers**

100

**100% new ancillary parts,
with new CV Joints Boots,
grease and clips**

60

All Shaftec Driveshafts come with
a **60 Month, 60,000 miles /
96,000 km warranty**

DRIVESHAFTS

The Driveshaft is the part that gave the business its name – and at Shaftec, we've been remanufacturing them in the UK for more than 25 years. The range of new and remanufactured Driveshafts totals more than 6,500 references, and because we carry every part in stock – as standard – we'll always have the part you need when you need it.

We remanufacture the programme under the strictest of conditions. Each Driveshaft is stripped right back to the bare bones and inspected to ensure that there are no defects.

If it passes our stringent inspection process, it is then remanufactured to the original state and reassembled by hand using new ancillary parts – that's brand-new CV joints, boots, grease and clips.

After assembly each part is tested to the extreme to meet ISO 9001:2015 quality standards.

- Excellent availability and next day delivery
- Backed by the highest marketing, data and cataloguing support
- Accompanied by a 60 Month, 60,000 mile / 96,000 km warranty

“Our Range of OE matched quality Driveshafts for the European Aftermarket offers exceptional car parc coverage and is backed by the highest levels of availability and customer service.”

NOTE: Over time, even the best-quality CV Boots will tear and crack. Quick replacement is essential to avoid more serious damage to the drive shaft or wheel joints.

CV JOINTS

At Shaftec our full range of CV Joints consists of 1192 part numbers, which between them account for almost 99% of the European vehicle car parc.

For a faster, safer and more efficient replacement, all our CV Joints are supplied with the CV Boot, two steel clips, grease, hub nut and replacement circlip. Job done.

- Excellent availability and next day delivery
- Backed by the highest marketing, data and cataloguing support
- Accompanied by a 60 Month, 60,000 mile / 96,000 km warranty

CV BOOT KITS

At Shaftec, our quality range of CV Boot Kits consists of 270 part numbers, covering 98% of all European applications. Tested to the extreme, all CV Boots are manufactured from premium grade rubber and are highly resistant to water, salt and grit. All supplied with Steel Bands and Grease.

- Excellent availability and next day delivery
- Backed by the highest marketing, data and cataloguing support
- Accompanied by a 12 Month, 12,000 mile / 19,000 km warranty

SHAFTEC SELECT DRIVESHAFTS

All of our SELECT driveshafts come with an impressive 60 Month, 60,000 miles / 96,000 km warranty for added peace of mind and we are ranked UK's number one for vehicle parc coverage.

AXLE SHAFTS

The Axle Shaft range caters to applications from 2007 onwards, for popular vehicles such as the Mercedes Sprinter and VW Crafter. Our Axle Shafts all come with a 24 Month / 24,000 mile warranty, maintaining our commitment to exceptional warranties and highlighting our faith in the quality of our products.

PROPSHAFTS

Our Range of new surcharge free, OE matched quality Propshafts for the European aftermarket offers exceptional car parc coverage and is backed by the highest levels of availability, customer service, marketing and technical support - with next day delivery available.

Wide car parc coverage across classes available for a wide range of Rear Wheel Drive (RWD), All Wheel Drive (AWD), Four Wheel Drive (4WD), passenger cars and light commercial vehicles across most vehicle manufacturers, the programme consists of one-, two- & three-piece shafts, and all parts are accompanied by a 24 Month, 24,000 miles / 38,000 km warranty, as standard.

- Over 170 part numbers with many more in development
- Engineered for low Noise Vibration Harshness (NVH)
- 100% balanced
- Inspected for Radial run-out
- 24 Month, 24,000 miles / 38,000 km

STEER.

1300

New and remanufactured programme of Shaftec branded Steering Racks
total more than 1300 references

100

Every unit is **100% factory tested** beyond the capacity experienced on the vehicle

12,000

Steering Rack Gaiters come with a
12 Month, 12,000 mile / 19,000 km warranty

95

Our range of steering rack gaiters **caters for 95% of the European** car parc

STEERING RACKS

At Shaftec we've been remanufacturing steering racks since 2010. Together, the new and remanufactured programme of Shaftec branded Steering Racks total more than 1300 references. We remanufacture the entire programme, in-house at our industry leading facility in Birmingham, UK.

Each individual steering rack is stripped right back to the original casting and inspected to ensure that there are no defects. All Shaftec branded steering racks are then remanufactured to the original state and reassembled by hand using brand new components, and of course, every unit is 100% factory tested beyond the capacity experienced on the vehicle.

- Excellent availability and next day deliver
- Backed by the highest marketing, data and cataloguing support
- Accompanied by a 12 Month, 12,000 mile / 19,000 km warranty

Parts now available for LHD applications.

STEERING RACK GAITERS

Our range of steering rack gaiters consists of over 130 part numbers and caters for 95% of the European car parc.

Tested to the extreme, all Steering Rack Gaiters are manufactured from premium grade rubber and are highly resistant to water, salt and grit.

- Excellent availability and next day delivery
- Backed by the highest marketing, data and cataloguing support
- Accompanied by a 12 Month, 12,000 mile / 19,000 km warranty

NOTE: Over time, even the best-quality steering rack gaiters will tear and crack. Quick replacement is essential to avoid more serious damage to the steering system.

“Our premium programme of remanufactured steering racks consists of over 1300 part numbers. We remanufacture the entire programme, in-house at our industry leading facility in Birmingham, UK.”

STEERING PUMPS

At Shaftec, we're ahead of the game with steering developments. Our premium remanufactured steering pump programme consists of over 1500 part numbers.

We remanufacture the entire programme, in-house at our leading remanufacturing facility in Birmingham, UK. Every unit is 100% factory tested beyond the capacity experienced on the vehicle.

As Standard at Shaftec:

- Excellent availability and next day delivery
- Backed by the highest marketing, data and cataloguing support
- Accompanied by a 12 Month, 12,000 mile / 19,000 km warranty

ELECTRIC STEERING

We've invested in the latest generation machinery and testing equipment as well as in our skill base. And our range is growing all the time, in line with market requirements.

Electric Power Steering (EPS) systems are fast replacing conventional hydraulic steering systems because they are lighter in weight, require less maintenance, offer a better response at different speeds, provide higher durability, and use less fuel.

In line with this, being well ahead of the game, Shaftec has invested heavily in this area to be able to best serve the aftermarket as these parts come through.

All core that meets Shaftec's strict remanufacturing criteria are stripped back to the bare bones and remanufactured using new motors, rubber and ancillary parts.

Fast growing range

- **Electric Power Steering Racks:** over 790 part numbers
- **Electric Power Steering Columns:** over 270 part numbers
- **Electric Power Pumps:** over 110 part numbers
- All Electric Steering parts carry a 12 Month, 12,000 mile / 19,000 km warranty

STOP.

6000

Our premium remanufactured range consists of over **6000 part numbers**

CALIPERS

At Shaftec we've been remanufacturing Brake Calipers since 2007. Our premium remanufactured range consists of over 6000 part numbers. All Shaftec Calipers are subject to a Surcharge.

Remanufacturing is not just a poorer substitute for new. It's a process which results in components that are as good as new, tested as new and perform in that way for the lifetime of the part.

Each Shaftec branded Brake Caliper is stripped right back to the original casting and inspected to ensure that there are no defects. All Brake Calipers are then refurbished to the original state reassembled by hand using brand new components.

This means 100% new pistons, springs, actuation parts and seals. Nothing is left untouched and everything is completely renewed to the highest quality of ISO 9001:2015.

At Shaftec we don't batch test. So, after assembly each individual brake caliper is air pressure tested beyond the capacity experienced on the vehicle.

- Includes EPB (Electronic Parking Brake)
- Excellent availability and next day delivery
- Backed by the highest marketing, data and cataloguing support
- Accompanied by a 24 Month, 24,000 miles / 38,000 km

“Each Shaftec branded Brake Caliper is stripped right back to the original casting and inspected to ensure that there are no defects. All Brake Calipers are then refurbished to the original state.”

SHAFTEC SELECT CALIPERS

Our **SELECT** range consists of over 700 part numbers. Same great quality as our full programme but;

- Surcharge Free
- Includes EPB (Electronic Parking Brake)
- Core buy back scheme
- 24 Month, 24,000 miles / 38,000 km warranty
- Excellent availability and next day delivery
- Backed by the highest marketing, data and cataloguing support

QUALITY

Remanufacturing accounts for 60% of all sales at Shaftec. Remanufacturing is where our business started, and as such it's in our blood. While we do offer new part programmes in areas that can't be remanufactured, we firmly believe in the process as it results in components which are as good as new and perform in that way for the lifetime of the product.

- Better for the environment as it utilises less energy and raw materials, and gives new life to a part which would otherwise end up in landfill
- A more financially efficient solution
- Often the only way to keep older vehicles on the road. An aging vehicle parc requires availability of parts long after the end of vehicle type production

At Shaftec, it's important to us that the industry knows the difference between a remanufactured part and a reconditioned part. A remanufactured piece goes through stringent reverse engineering and testing processes and then comes complete with the same warranty as a new part. A reconditioned part can simply just be given a coat of paint. Clearly, this affects the quality, safety and price of the component.

The increasing use of electronics in automotive components represents a challenge for many. But not for us. When it comes to the remanufacture of Electric Power Steering (EPS) products, and Electronic Parking Brakes (EPB) Shafter leads the way.

KNOWLEDGE HUB

The more we learn, understand and know, the stronger our part plays in the supply chain for automotive

At Shaftec we have an immense amount of knowledge, skills and expertise. To empower our customers and suppliers we have established what we call our 'knowledge hub.' This hub you will find on our website, a page dedicated to everything we believe you need to know within the automotive industry from sizes, packaging, parts and so much more. The more we learn, understand and know, the stronger our part plays in the supply chain for automotive. We share this information in easy to view downloadable PDF files for customers and technicians to take away and read.

You can view and download:

- Fitting guides
- Core returns criteria
- Servicing
- Product information
- Core acceptance guidelines
- Technical bulletins
- Sizing charts

Reman & Return Programme

We hold up to six months' worth of stock, but in case we don't have the part you need, Shaftec operates a thorough, efficient and safe 'Reman & Return' programme for:

- Brake Calipers
- Driveshafts
- Steering Racks
- Steering Pumps

Put simply, this means that if the part that you return to us meets its returns criteria, Shaftec will remanufacture and return that EXACT part to you – with the same warranty as the off the shelf, aftermarket product.

Dedicated Sales Support
and Technical Support
Teams are always available

“We hold up to six months’ worth of stock, but in case we don’t have the part you need, Shaftec operates a thorough, efficient and safe ‘Reman & Return’ programme.”

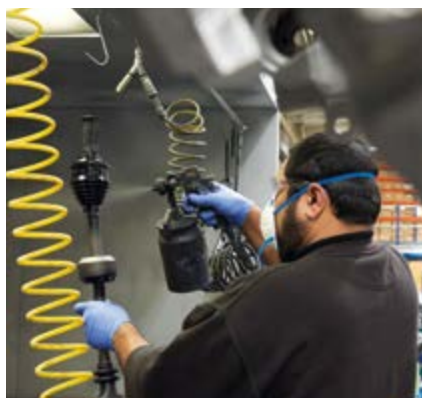

Our growth and success is testament to our smart thinking and careful expansion programme

Availability and range

Availability and range are key to our success. Not only do we lead the way in the development of remanufactured Electric Power Steering (EPS) – but are further expanding across Europe.

Our growth and success is testament to our smart thinking and careful expansion programme. We’ve come a long way, and we’re very proud of this. But we’re now ready to go even further.
